(54) Title: ECONOMICAL SYSTEM FOR COMMUNICATING TWO TERMINALS THROUGH INTERNET

(54) Titre: SYSTEME ECONOMIQUE DE MISE EN COMMUNICATION DE DEUX TERMINAUX DE COMMUNICATION A TRAVERS L'INTERNET

## (57) Abstract

The invention concerns a method for communicating at least two communication terminals (T1, T2) through Internet (100), wherein the two terminals (T<sub>1</sub>, T<sub>2</sub>) are connected to a telephone network (101). The first of the two terminals (T<sub>1</sub>) calls the second terminal (T<sub>2</sub>) through the telephone network (101) and request it to call it subsequently, then connects itself to the computer network (100) and obtains a computer address; as agreed, the second terminal (T2) subsequently calls the first terminal (T1) which then transmits to it its computer address, through the telephone network (101); and the second terminal (T2) connects itself to the computer network (100) and obtains a computer address which it transmits to the first terminal (T1) through the computer network (100).
